

We are a well-established boutique IP firm serving European and international clients in the healthcare and life science industries. Our team provides a broad range of services spanning from patent prosecution, expert opinion work to business-oriented, holistic IP consulting tailored to the needs of our clients. Especially for our SME clients, we foster close working relationships that enable us to provide IP support with high relevance and business impact.

Driven by a growing number of client relationships, we seek for our office in **Berlin (Germany)** or **Basel (Switzerland)** a

US Patent Attorney / Patent Agent (60-100 %)

Healthcare & Medical Devices

Your role:

- Work with clients in analysing R&D data to identify patentable matter
- Develop protection strategies for healthcare technologies and products
- Draft, file and prosecute US patent applications
- Provide expert opinions on patent matters
- Perform patent landscape and freedom-to-operate studies
- Support clients in due diligences

We expect:

- A highly motivated, reliable and thoroughly service-minded IP expert
- Qualification as a US Patent Attorney or Patent Agent
- At least 3-5 years post-qualification experience
- Healthcare or Life Science sector experience
- A collaborative spirit based on integrity and respect
- A passion for quality and client value
- A results-driven, efficient work style
- Ability to utilise modern IT infrastructure

We offer a challenging and rewarding position in a friendly team, visibility and interaction with highly attractive industry partners, competitive remuneration, and a high level of flexibility in organising your work schedule, including an option for partial work from your home office.
